DETAILED ACTION

Receipt of applicants' amendments and remarks submitted February 8, 2005 is acknowledged. The amendments and remarks have been fully considered, and are persuasive to overcome the rejections set forth in the prior office action and the elected species set forth in response submitted January 4, 2000 have been found allowable. The examination has been extended to no-elected species read on pending claims.

Claim Objections

1. Claims 59, 60, 80-84, 95-98 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections 35 U.S.C. 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 55-58, 61-65, 68-79, 85, 89-94, and 99 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 79 and 99 recite vitamin B2 and B3, which lack support from the application as originally filed. Since claim 79 and 99 ultimately depend on claim 55, the rest of the claims are also properly rejected as they encompass the subject matter recited in claims 79 and 99.

Reasons for Allowance

Claims as amended requiring a homogeneous carrier system consisting essentially of solvent and a viscosity enhancing agent that is a waxy substance, which would exclude the water absorbing materials disclosed in the cited prior art. the claims have been examined to the extend that the biological active agents are lipophilic compounds. The rejected claims are not enabled for reason set forth above.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
